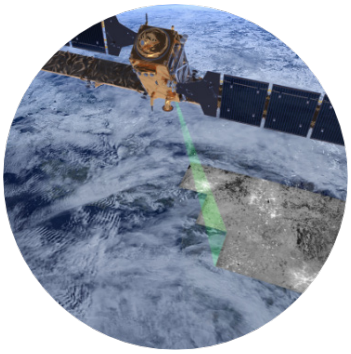
Join our Environment Department as:

Project Manager (m/f/d)

GeoVille

25+ years of excellence in satellite based geo-information solutions.
Cutting edge technologies, innovations and implementations in over 140 countries.



Innovative geospatial data analytics & IT-technologies

Earth Observation products and services for environmental monitoring

Satellite information supporting client operations worldwide

You see the bigger picture and turn complex challenges into clear objectives?
Then GeoVille is THE place for you to work.
We are looking for a Project Manager strengthening our team.

Your tasks

You will collaborate with our innovation, development, and operations teams and coordinate with our international customers the implementation of innovative satellite-based environmental land monitoring solutions. Your responsibilities include:

- Planning, implementation and controlling of projects (scope, budget, schedule, risks)
- Functional analysis of customer requirements and consulting
- Implementing projects according to project and quality management standards
- Leading or contributing to interdisciplinary and international project teams
- Organizing and managing project meetings
- Promotion of our products and services
- Support the identification of new business opportunities and collaboration in project acquisition

Your strengths & competences

You excel in environments where strategic planning aligns with practical implementation and meet the following requirements:

- Completed studies in (geo-)informatics domain or corresponding professional experience in the EO, GIS or IT sector (3+ years)
- Experience in project management (3+ years); certification of advantage (e.g. PMI, IPMA, PRINCE2)
- Strong communication skills and the ability to balance stakeholder interests in an international environment
- Motivated to actively engage and shape new topics in Earth Observation and environmental monitoring
- Willingness to travel internationally
- Fluent English
